Designed around the professional use of the Apple PowerBook™, ***LE*** bag Pro is more than ever your digital tool case .

Let's use :

padded elevated computer sleeve, rigid and padded structure*, neoprene accessories organizer panel**, 2 mesh document pockets, 4 neoprene fast access pockets, water and wear resistant nylon and zip,lockable zip head with protective covering flap, easy-grip handle above gravity center, large padded shoulder strap, padded back with air tunnel

Let's take away :

computer, AirPort Express™, iPod™, iPod™ speakers, iPod ™ power adapter, iSight™, iSight™ support, cables, power adapter, FireWire cable + iPod™ Dock + plug, power cord, VGA and video adapter, A4 books, scheduler, passports, airplane tickets, papers, mobile phone, business cards, pens

Vocabulary :

*Rigid & padded structure : the structure of ***LE*** bag BP offers serious protection for your PowerBook™ by combining efficient rigidity with shock absorption. A vertical PE board works as a rigid spinal column, supporting your laptop and the heavily padded bottom protects the whole thing from shocks and vibrations. Both sides are padded as well to enclose all your stuff in a protective shell.

Neoprene organizer panel : this innovative feature from Be-ez takes advantage of ***LE* bag's unique vertical arrangement to store and organize all your accessories without jamming the bottom of your bag, saving a lot of precious space when on the go.
